

Heterogeneous Metallic Waste

Artikkelnr. 10 01 451a

NS:1452

Heterogeneous metallic waste

Iron and metals

Should contain

- ✓ Different types of metal.
- ✓ Can be elements of, for example, plastic and wood.

Should not contain

- ✓ Other types of waste
- ✓ Not decontaminated metal waste:
 - Scrap iron with hazardous waste.
 - Car wrecks containing fuel or oils.
 - Tanks that have not been cleaned.
 - Closed gas cylinders should be handled as they are under pressure.
 - Compressor/lawnmowers containing oils and fuel.

Description

Heterogeneous metallic waste is composed of different types of metal.

Collection

Open hook or lift container.

Processing

The metal is sorted into the different types when ground down.

Recycling

Smelted down into new products. The material is recycled.

Non-compliance

A sorting fees can be charged if the item is not sorted into homogeneous fraction. If it is not possible to sort, the entire delivery can be reclassified.
