

Insulation, mineral wool

Is to contain

- ✓ Mineral wool or stone wool
e.g. Glava, Rockwool, ceiling boards, winter mats, sewn mats

Is not to contain

- ✓ Insulation made of materials other than those mentioned above.
- ✓ Other waste materials

Description

The item consists of insulation from construction and demolition projects.

Collection

Hook lift containers.

Processing

Upon delivery, a visual check is performed at the waste reception facility before storage with another corresponding fraction.

Insulation is placed in a separate cell at the waste disposal site.

Recycling

Mineral wool and stone wool are taken to waste disposal sites, since the quality is mostly too low a grade for manufacturers to use for the production of new insulation.

Non-compliance

A sorting fee may be charged if the item is not sorted into a homogeneous fraction. If sorting is not possible, the entire delivery can be reclassified as residual waste.
