

Waste sorted for Incineration

NS:9912

Waste sorted for incineration

Is to contain

- ✓ Waste fractions suitable for energy extraction.

Is not to contain

- ✓ Batteries
- ✓ Hazardous waste
- ✓ Explosives
- ✓ Radioactive substances
- ✓ Infectious waste
- ✓ E-waste, metallic waste
- ✓ Drywall and insulation
- ✓ Food waste
- ✓ Stones, Leca and bricks
- ✓ Large units
- ✓ Tires, rims

Description

Different types of combustible waste.

Collection

Receptacles, bags, lift hook containers.

Processing

Upon delivery, a visual check is performed at the waste reception facility. The waste is delivered directly for incineration.

Recycling

The residual waste is delivered to approved waste-to-energy plant where district heating and process steam are produced.

Non-compliance

A sorting fee may be charged if the item is not sorted into a homogeneous fraction. If sorting is not possible, the entire delivery can be reclassified.
