

Pure concrete with reinforcement

Is to contain

- ✓ Uncontaminated concrete, with reinforcement both crushed and larger units.

Is not to contain

- ✓ Flooring
- ✓ Earth
- ✓ Heating cables
- ✓ Wood
- ✓ Contaminated concrete

Description

Hardened concrete from demolition.

Collection

Concrete is amassed in containers or tipping vehicles with trailers. Please take care that collection units are not loaded heavier than allowed. Contact the transport department at ØG for guidance. Waste is to be characterized by basis before delivery. A form is to accompany the waste to the waste reception facility. Contamination is to be documented by analyzes.

Processing

Concrete is to be broken down.

Recycling

Used for reinforcement in parking facilities, walkways, courtyards, waste disposal facilities, etc.

Non-compliance

A sorting fee may be charged if the item is not sorted into a homogeneous fraction. If sorting is not possible, the entire delivery can be reclassified.

Reference to regulations

The insulation is inert and is not covered by the waste disposal site ban.

Special risk conditions

Concrete is not dangerous but avoid inhalation of dust and direct skin contact. For large units, there may be a risk of crushing injuries.
